Susan Bornstein, M.D., MPH
5907 Brittany Valley Road
Louisville, KY 40222

Dear Susan:

The members and affiliates of the Kentucky State AFL-CIO support the work of The Asclepius Initiative to eliminate disparities in healthcare coverage and health outcomes based on socioeconomic or demographic differences and achieve policy changes that enable every American to have access to healthcare that meets their needs, through a more affordable, streamlined, accessible, and easy-to-navigate healthcare delivery system.

As you know, health care is a major concern for our members who are constantly trying to keep ahead of health care costs in contract negotiations. The Kentucky State AFL-CIO has long recognized that health coverage and costs are unevenly distributed and unfairly penalize those not covered by a union contract to the detriment of our economy and the health of all Americans. That is why the Kentucky State AFL-CIO is on record supporting universal health coverage for all Americans.

I would like to thank The Asclepius Initiative for undertaking this critical effort and we look forward to working together to achieve our shared goals.

Sincerely,

Bill Londrigan
